SUMMARY

Higher Technician in Web Application Development with 1 year of experience building web applications. Experienced with JavaScript, Java, HTML5, CSS3, SQL, REST APIs, and tools such as Git and Postman. I have contributed to the development and maintenance of web applications and built personal projects using layered architecture and real data persistence. Looking for a Junior Web Developer role to continue growing professionally.

WORK EXPERIENCE

Web Developer Intern

Veterinary Automation SL

01/2026 – 07/2026

Spain, Remote

- Implemented user authentication with password-based login and a three-tier role system (property administrator, president, resident), each with different access levels.
- Redesigned the incident management panel by adding a "Resolved" status flow, allowing property administrators to close incidents directly – eliminating a gap where incidents previously had no closing state.
- Optimized the PDF generation process for payment receipts, improving reliability and delivery speed.
- Worked with JavaScript, HTML5, and CSS3 in a professional team following best practices.

Tech Stack: JavaScript, HTML5, CSS3, SQL

Web Developer Intern

Adviser Cloud

05/2025 – 11/2025

Spain, Remote

- Improved the structure and presentation of a corporate website using WordPress and Elementor.
- Optimized navigation experience by reorganizing content and visual components to improve accessibility of information.
- Implemented layout and design improvements to maintain visual consistency across sections.
- Collaborated on content optimization and website maintenance tasks within a professional development environment.

Tech Stack: WordPress, Elementor, HTML, CSS

Cashier / Stock Associate

Normal

08/2024 – Present

Spain, On-site

Customer service, cash handling, restocking, and sales floor maintenance. Developed organizational skills, attention to detail, and teamwork in a full-time role.

PROJECTS

Astratech Employees – CRUD Dashboard [↗](#)

JavaScript · Vite · PostgreSQL · Supabase · HTML5 · CSS3

- Built an employee management dashboard with full CRUD functionality and application state management.
- Implemented record creation, editing, deletion, and retrieval through REST APIs.
- Migrated the data layer from json-server to PostgreSQL via Supabase while preserving the existing layered architecture.
- Designed a responsive interface for both desktop and mobile devices.
