SUMMARY

Higher Technician in Web Application Development with professional experience in JavaScript and hands-on development of applications in Angular with TypeScript, including reactive state management, forms, and component-based architecture. Looking for a Junior Frontend/Web Developer role.

WORK EXPERIENCE

Web Developer Intern

Veterinary Automation SL

01/2026 – 07/2026

Spain, Remote

- Contributed to the development of a management platform for residential communities, implementing authentication with a three-tier role system (property administrator, president, resident) and permissions differentiated by user type.
- Redesigned the incident management panel workflow by adding a "Resolved" status, allowing administrators to close incidents directly.
- Automated PDF generation for payment receipts upon clicking the download button, replacing a previous manual process.
- Contributed to interface design over the 6-month development period, progressively improving the visual design and creating specific views for different residential communities.

Web Developer Intern

Adviser Cloud

05/2025 – 11/2025

Spain, Remote

- Laid out and designed 4 sections of a corporate website (home, contact, services portfolio, company history) using WordPress, Elementor, and Illustrator.
- Reorganized the navigation structure and visual components to improve information accessibility for users.

Tech Stack: WordPress, Elementor, HTML, CSS

Cashier / Stock Associate

Normal

08/2024 – Present

Spain, On-site

Customer service, cash handling, restocking, and sales floor maintenance. Developed organizational skills, attention to detail, and teamwork in a full-time role.

PROJECTS

K-Beauty Stock Manager – Inventory Management 🔗

06/2026 – 09/2026

Angular · TypeScript · HTML5 · CSS3

- Implemented a central service using Angular Signals for reactive state management, including derived values with computed() for real-time inventory metrics (low stock, out-of-stock products, total value).

- Built full CRUD operations (create, edit, delete, list) with dynamic routing and programmatic navigation between views (dashboard, list, detail, and form).
- Built dual reactive forms (create/edit) with custom validations and visual feedback using Angular Material.
- Integrated Angular Material for a consistent, responsive interface, including card, form, and navigation components.

Repository [↗](#)

Astratech Employees – CRUD Dashboard [↗](#)

JavaScript · Vite · PostgreSQL · Supabase · HTML5 · CSS3

- Built an employee management dashboard with full CRUD functionality and application state management.
- Implemented record creation, editing, deletion, and retrieval through REST APIs.
- Migrated the data layer from json-server to PostgreSQL via Supabase while preserving the existing layered architecture.
- Designed a responsive interface for both desktop and mobile devices.
